#### **DETAILED ACTION**

#### Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 19 – 30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 - 45 of U.S. Patent No. 6,654,032. Although the conflicting claims are not identical, they are not patentably distinct from each other because both the present Application and U.S. Pat. No. 6,654,032 disclose the following:

A distributed system for collaborative computing comprising:

a web zone for allowing a plurality of client computers to access the distributed system via a global-area network, the web zone having at least one web server;

a meeting zone for supporting an on-line conference among the plurality of client computers, the meeting zone having a meeting manager, a plurality of collaboration servers, and a plurality of application servers, wherein:

Art Unit: 2141

the meeting manager is operable to manage the on-line conference in the meeting zone;

each collaboration server is operable to host at least a portion of the online conference; and

each application server is operable to support at least one service for the on-line conference.

Each collaboration server and each application server comprises a respective logical server.

The meeting zone comprises a process manager for monitoring each logical server.

The meeting zone comprises a zone manager for supporting communication among the logical servers.

The meeting manager is operable to maintain status information for the meeting zone.

At least one service for the on-line conference comprises one of document viewing, file sharing, video, VOIP, telephony, polling, chat, and application sharing.

The meeting manager is operable to manage all the collaboration servers and the application servers in the meeting zone.

Art Unit: 2141

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 19 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Quatrano et al. (U.S Pat. No. 6,748,420) (Methods and Apparatus for Providing Shared Access to an Application).
- 4.1 Regarding claim 19, Quatrano discloses a distributed system for collaborative computing comprising:

a web zone for allowing a plurality of client computers to access the distributed system via a global-area network, the web zone having at least one web server (Fig. 3; Abstract);

a meeting zone for supporting an on-line conference among the plurality of client computers, the meeting zone having a meeting manager, a plurality of collaboration servers, and a plurality of application servers (Figs. 3, 8, 9; col. 18, lines 7 – 15; col. 29, line 66 – col. 30, line 46), wherein:

Art Unit: 2141

the meeting manager is operable to manage the on-line conference in the meeting zone (col. 18, lines 7 – 15; col. 29, line 66 – col. 30, line 46);

each collaboration server is operable to host at least a portion of the online conference (Fig. 8; col. 29, line 66 – col. 30, line 20); and

each application server is operable to support at least one service for the on-line conference (Fig. 9; col. 30, lines 22 - 35).

- 4.2 Per claim 20, Quatrano teaches that each collaboration server and each application server comprises a respective logical server (Fig. 9; col. 30, lines 22 35).
- 4.3 Regarding claim 21, Quatrano discloses that the meeting zone comprises a process manager for monitoring each logical server (Fig. 9; col. 30, lines 22 35).
- 4.4 Per claim 22, Quatrano teaches that the meeting zone comprises a zone manager for supporting communication among the logical servers (col. 18, lines 7 15).
- 4.5 Regarding claim 23, Quatrano discloses that the meeting manager is operable to maintain status information for the meeting zone (col. 16, lines 8 31).
- 4.6 Per claim 24, Quatrano teaches that the at least one service for the on-line conference comprises one of document viewing, file sharing, video, VOIP, telephony, polling, chat, and application sharing (Abstract "application").

Art Unit: 2141

- 4.7 Regarding claim 25, Quatrano discloses that the meeting manager is operable to manage all the collaboration servers and the application servers in the meeting zone (Figs. 8, 9; col. 29, line 66 col. 30, line 47).
- 4.8 Per claims 26 30, the rejection of claims 19 25 under 35 USC 102(e) (paragraphs 4.1 4.7) applies fully.
- 5. Claims 19 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Stewart et al. (U.S Pub. No. 2002/0010741) (Workflow Integration System for Enterprise Wide Electronic Collaboration).
- 5.1 Regarding claim 19, Stewart discloses a distributed system for collaborative computing comprising:

a web zone for allowing a plurality of client computers to access the distributed system via a global-area network, the web zone having at least one web server (Figs. 3, 5, 8);

a meeting zone for supporting an on-line conference among the plurality of client computers, the meeting zone having a meeting manager, a plurality of collaboration servers, and a plurality of application servers (Fig. 4, item 152), wherein:

the meeting manager is operable to manage the on-line conference in the meeting zone (Fig. 8, item 214);

Art Unit: 2141

each collaboration server is operable to host at least a portion of the online conference (Figs. 1, 3, 8); and

each application server is operable to support at least one service for the on-line conference (Figs. 1, 3, 8).

- 5.2 Per claim 20, Stewart teaches that each collaboration server and each application server comprises a respective logical server (Fig. 1).
- 5.3 Regarding claim 21, Stewart discloses that the meeting zone comprises a process manager for monitoring each logical server (Fig. 8, item 214).
- 5.4 Per claim 22, Stewart teaches that the meeting zone comprises a zone manager for supporting communication among the logical servers (Fig. 8).
- 5.5 Regarding claim 23, Stewart discloses that the meeting manager is operable to maintain status information for the meeting zone (Fig. 9; p. 9, paragraph 151 "The conversation manager is responsible for ... maintaining the status of the conversation").
- Per claim 24, Stewart teaches that the at least one service for the on-line conference comprises one of document viewing, file sharing, video, VOIP, telephony, polling, chat, and application sharing (p. 8, paragraphs 131, 132; p. 9, paragraph 135).

Art Unit: 2141

- Regarding claim 25, Stewart discloses that the meeting manager is operable to manage all the collaboration servers and the application servers in the meeting zone (Fig. 8, item 214).
- 5.8 Per claims 26 30, the rejection of claims 19 25 under 35 USC 102(e) (paragraphs 5.1 5.7) applies fully.

#### Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8447. The examiner can normally be reached on 5 4 9.
